

SENTHILARUN K

Android Developer | Kotlin | Jetpack Compose

Chennai, India | gksenthilarun@gmail.com | +91-8760868844 | www.linkedin.com/in/gksarun/

PROFESSIONAL SUMMARY

Android Developer with 8 years of experience building high-performance, offline-first, and scalable apps using Kotlin, Jetpack Compose, MVVM, and Clean Architecture. Specialized in Bluetooth/Wi-Fi device communication, Room-based data syncing, performance optimization, and secure payment integrations. Proven ability to reduce crashes, improve app stability, and accelerate release cycles in Agile environments.

WORK EXPERIENCE

Capgemini, Bangalore

Professional II – Software Engineer

July 2023 – Present

- Developed Android modules for EV charger using Kotlin and Jetpack Compose, enabling charger communication over Wi-Fi and Bluetooth.
- Added offline-first capability by syncing cloud data with the Room database, improving app reliability by 20%.
- Improved code quality via SonarCloud, automated test suites, and regression checks, reducing defects by 25%.
- Streamlined build & release workflows using Firebase App Distribution, accelerating feature delivery.

Logic Soft Pvt. Ltd, Chennai

Senior Android Developer

January 2020 – June 2023

- Modernized legacy Android apps by refactoring outdated components and migrating to MVVM & Jetpack libraries.
- Built billing features including camera-based scanning, Bluetooth printing, Excel import/export, and offline data management; integrated Sentry Crashlytics to reduce crash rate by 30%.
- Provided technical leadership through feature design, code reviews, and mentoring junior developers.
- Managed full Google Play Store release cycle including builds, QA, publishing, and post-release support.

Sparkout Tech Solution, Coimbatore

Android Developer

December 2017 – January 2020

- Developed scalable features using Kotlin, Clean Architecture, and modular development.
- Delivered key taxi booking features including live tracking, driver-rider communication, and Stripe/Braintree payments, improving real-time tracking accuracy by 60%.
- Implemented Google/Facebook/Twitter logins and RSS feeds for a news app, enhancing engagement.

EDUCATION

Bachelor of Engineering in Electronics and Communication

Anand Institute of Higher Technology, Chennai

April 2013 – June 2017

SKILLS

- Languages: Kotlin, Java
- UI: Jetpack Compose, XML, Material Design
- Architecture: MVVM, Clean Architecture, Repository Pattern
- Dependency Injection: Dagger, Hilt
- Networking: Retrofit, OkHttp
- Databases: Room, SQLite
- Testing: Junit, Mockito
- Google Services: Google Maps, Places API, Firebase
- Tools: Android Studio, Git, Gradle, Figma, Jira, SonarCloud

CERTIFICATIONS

- Advanced Programming in Kotlin – Meta
- Kotlin Multiplatform Masterclass (KMP, KMM) - Udemy
